

FIDLOCK ready text modules

Status: 7.3.2023

FIDLOCK-ready in general

(This bike is) FIDLOCK-ready!

Selecting a bike that is FIDLOCK-ready is a choice for great flexibility with accessories. Do you need a bottle, a bag, a toolbox or a lock on your bike frame? With TWIST, you can adapt your set-up for the day in a flash. Moreover, TWIST offers even more possibilities, such as attaching accessories to your backpack's strap with the TWIST tex base. The VACUUM mounts allow you to always have your smartphone in view and at hand – be it on your bike, in your car, on a hike or at home!

- Clean and compact design
- Quick and secure attachment without a bottle cage
- Intuitive, single-handed use
- Modular concepts for a wide range of applications for more than bikes
- Mag(net)ic: innovative technology, strong connection and easy operation

TWIST (bike focus)

(This product is) FIDLOCK-ready for TWIST

The unique and patented TWIST technology freed the bottle from its cage and replaces bulky mounts on the bike frame. The small TWIST base is an inconspicuous, intuitive and secure alternative. You can detach the bottle with an easy and swift one-handed movement. To reattach it to the frame, just let it snap back onto the TWIST base. However, TWIST is much more than just a bottle holder for bikes. Every day, you can decide anew what you want to take with you – be it a bottle, a bag, a toolbox or rather a lock.

- Clean and compact design
- Quick and secure attachment without a bottle cage
- Intuitive, single-handed use
- Modular concepts for numerous applications on the bike frame – be it bottle, bag, toolbox, range extender or lock
- Mag(net)ic: innovative technology, strong connection and easy operation

TWIST (bag focus)

(This product is) FIDLOCK-ready for TWIST

The unique and patented TWIST technology freed the bottle from its cage and bulky mounts on the bike frame. However, TWIST is much more than just a bottle holder for bikes. You can attach TWIST accessories to your backpack or bag with a TWIST tex base. This concept creates countless possibilities: How about a bottle that is always ready at hand during hikes? Or rather a small bag for shopping trips,

avoiding frantic searches for change in your backpack at checkout? With this modular set-up, decide each day, what you need!

- Quick and secure attachment
- Intuitive, single-handed use
- Modular concepts for diverse accessories
- Absolute flexibility for daily life: compatible with the TWIST bike base

VACUUM

(This product is) FIDLOCK-ready for the VACUUM smartphone mount

This bike features a VACUUM ahead cap, allowing you to retrofit a VACUUM ahead cap base with ease. The VACUUM smartphone mounts uniquely combine the invisible forces created by a vacuum and magnets. With a VACUUM case or patch, you can simply let your smartphone snap onto the base to attach it securely. After the ride, just push the lever and remove the phone from the bicycle in a flash.

- VACUUM ahead cap base easily retrofittable
- Intuitive, single-handed use
- Quick attachment with a secure connection
- Easy to make your smartphone VACUUM-compatible: phone cases for diverse models, adhesive patch for your favourite phone case or a waterproof case for rainy days
- Mag(net)ic: an innovative combination of two invisible forces
